

August 25, 2010

Dear Mr. A.G. Kawamura:

We support the hearing to floor the all milk price at \$14.50 per hundred wt. The cost of production prices have effected our dairy operation greatly. It is difficult to stay in business with the high cost of feeds, environmental standards , dairy supplies , equipment and labor wages. Our break even costs are \$15.00 - \$15.50 at the present time. Grain & feed prices have increased dramatically due to the purchasing of corn for ethenol. A price floor of \$14.50 will help dairies in the future. Thank you.

Sincerely,

Corneluis A. Vanderham
